Trans. of Acustica (Switzerland) 1952, v. 2, no. 6,
p. 263-281.

DESCRIPTORS: *Membranes, *Acoustics, Sound,
Mathematical analysis, Acoustic impedance,
Vibration, Radiation effects.

General formulae are obtained for calculating the sound
field immediately in front of a vibrating rectangular
membrane. The virtual sound field is calculated by
graphical integration and illustrated by many diagrams.
Then general formulae for the radiation impedance are
derived; and finally its two components are calculated
